Application

1. Postoperative wound, acute and chronic injury wound, small cut wound and scratches, etc.
2. Clinical departments: Outpatient department, burns, orthopedics and other surgical departments

Instructions

1. Clean the wound, select the appropriate specification sterile dressing, get it out from the sterile packaging and peel off release paper.
2. The absorbent pad is aligned to wound, gently affixed it to the affected area then thoroughly stripped release paper.
3. Paste the non-woven around smoothly.

PRESSURE-SENSITIVE MEDICAL TAPE

HYNAUT Pressure-Sensitive Adhesive Tape

It adopts high-quality adhesive from German Henkel to ensure it is durable sticky and hypoallergenic.

The surface is made of non-woven paper / PE / cotton / silk, which is very light and easy to tear off.

This product can provide durable adhesion for wound dressing, bandage, etc. so that a reliable fixation can be effected.

It's used to contact directly with intact skin, instead of wound surface.
